MASIR

THE 4-WEEK GLUTE BAND PROGRAM

A lower-body plan for a set of mini loop bands. Three 30-minute sessions a week at home, written by a certified strength coach.

4	3×	30
weeks	a week	minutes a session

HOW THIS WORKS

Loop bands make your glutes and hips work harder on every rep, with no gym and no equipment to set up. The catch: most people rush, let their knees cave in, and never make it harder. This plan fixes all three.

You need

- A set of mini loop bands from light to heavy. The Masir kit has four: light, medium, heavy and extra-heavy.
- About 2 metres of floor, a mat or carpet, and a sturdy couch or bench for hip thrusts.
- 30 minutes, three days a week, with a rest day between sessions.

Read the sessions like this

TERM	MEANING
3 × 12	3 sets of 12 reps. Finish all sets of one exercise, resting 45-60 seconds between sets.
Effort	End each set with about 2 good reps left in the tank. If you could do 5 more, move up a band.
Tempo	1 second up, a 1-second squeeze at the top, 2 seconds down. Keep tension on the band the whole time.
Each side	Do all reps on one side, then switch.

Before every session: safety

- Check each band for nicks, tears or thin spots. Replace a damaged band; don't use it.
- If you have a latex allergy, check what your bands are made of before you use them.
- Place the band just above your knees, never on the knee joint itself.
- Keep your knees pushed out against the band; don't let them cave in.
- Stop any exercise that causes sharp pain.

> This is a general fitness program, not medical advice. If you have a medical condition or an injury, are pregnant, or haven't exercised in a long time, talk to your doctor before you start.

Warm-up (every session, 5 minutes)

Hip circles 10 each way · bodyweight glute bridges 12 · bodyweight squats 10 · lateral band walks 10 steps each way (light band)

WEEKS 1-2

LEARN THE PATTERNS

Light or medium band. The goal for these two weeks is control: knees out, hips square, the same smooth rep on the last set as on the first.

A Mon	Tue ·	B Wed	Thu ·	A Fri	Sat ·	Sun ·

Week 1: A, B, A. Week 2: B, A, B. Any three days work if there's a rest day between them.

Day A

	EXERCISE	SETS × REPS
1	Banded squat (band above knees)	**3 × 12**
2	Banded glute bridge	**3 × 15**
3	Lateral band walk	**3 × 12 steps each way**
4	Banded clamshell	**2 × 15 each side**
5	Plank	**3 × 20-30 seconds**

Day B

	EXERCISE	SETS × REPS
1	Banded hip thrust (shoulders on couch)	**3 × 12**
2	Banded reverse lunge	**2 × 10 each leg**
3	Banded donkey kick	**3 × 12 each leg**
4	Banded fire hydrant	**2 × 12 each leg**
5	Side plank	**2 × 20 seconds each side**

> On day 1, do one test with the medium band: how many clean banded squats you can do in 60 seconds, and how many single-leg glute bridges per side. Write both in your log. You'll retest in week 4.

WEEKS 3-4

BUILD STRENGTH

Same moves, more load. Move up one band on the main lifts, add a set, pause at the top of every bridge and thrust, and finish with a short burner.

Week 3: A, B, A. Week 4: B, A, B.

Day A

	EXERCISE	SETS × REPS
1	Banded squat	**4 × 12**
2	Banded glute bridge, 2-second pause	**4 × 12**
3	Lateral band walk	**3 × 16 steps each way**
4	Banded clamshell	**3 × 15 each side**
5	Plank	**3 × 30-40 seconds**

Day B

	EXERCISE	SETS × REPS
1	Banded hip thrust, 2-second pause	**4 × 12**
2	Banded reverse lunge	**3 × 10 each leg**
3	Single-leg glute bridge	**3 × 10 each leg**
4	Banded donkey kick	**3 × 15 each leg**
5	Side plank	**3 × 25 seconds each side**

Finisher (end of every session)

3 rounds, medium band, as smooth as you can: 20 lateral walk steps · 20 squat pulses · 30-second glute bridge hold

THE MOVES

COACHING CUES

Banded squat

Band just above your knees, feet a little wider than your hips. Sit back and down, chest up, and push your knees out into the band the whole way. Drive up through your whole foot.

Banded glute bridge

Lie on your back, band above your knees, feet flat and hip-width apart. Push your knees out, press through your heels and lift until your hips line up with your knees and shoulders. Squeeze, then lower slowly.

Lateral band walk

Band above your knees, quarter-squat, chest up. Step sideways with control, keeping tension on the band; don't let your feet touch or your knees cave.

Banded clamshell

Lie on your side, knees bent, band above your knees. Keep your feet together and open your top knee like a clamshell without rolling your hips back.

Plank

Forearms under shoulders, body in one straight line. Squeeze your glutes and brace your stomach; don't let your hips sag.

Banded hip thrust

Upper back on the edge of a sturdy couch, band above your knees, feet flat. Drive your hips up until your body is flat from shoulders to knees, chin tucked. Pause, lower slowly.

Banded reverse lunge

Band above your knees. Step one foot back and lower your back knee toward the floor, front knee pushing out against the band. Push through your front heel to stand.

Banded donkey kick

On hands and knees, band above your knees. Keep the knee bent and press one foot up toward the ceiling without arching your lower back.

Banded fire hydrant

On hands and knees, band above your knees. Lift one knee out to the side, keeping your hips level, then lower slowly.

Single-leg glute bridge

Like a glute bridge, but with one foot lifted. Keep your hips level as you rise and lower.

Side plank

Elbow under shoulder, body in a straight line from head to feet. Push your hips up and hold.

TRACK IT

YOUR LOG

Write down your band and your numbers for the two tests every week. Progress is the point.

WEEK	SQUATS IN 60 S: BAND	SQUATS IN 60 S: REPS	SINGLE-LEG BRIDGE: LEFT	SINGLE-LEG BRIDGE: RIGHT	HOW IT FELT
Day 1					
Week 1					
Week 2					
Week 3					
Week 4 retest					

After the 4 weeks

- Repeat weeks 3-4 with the next band up, or add a fourth session (A, B, A, B).
- Keep the 1-second squeeze at the top of every rep. When a set feels easy with your heaviest band, add a 3-second lower.

About the coach

Masir's programs are written by an ISSA Certified Personal Trainer and Strength & Conditioning Specialist who has coached clients one on one on the gym floor. Masir (Arabic for "destiny") is built for people who train at home, around full-time jobs.
